ABSTRACT

Regardless of the language in which the dissertation is written, usually there are at least two abstracts: one abstract in the same language as the main text, and another abstract in some other language.

The abstracts' order varies with the school. If your school has specific regulations concerning the abstracts' order, the NOVAthesis L^AT_EX (*novathesis*) (L^AT_EX) template will respect them. Otherwise, the default rule in the *novathesis* template is to have in first place the abstract in *the same language as main text*, and then the abstract in *the other language*. For example, if the dissertation is written in Portuguese, the abstracts' order will be first Portuguese and then English, followed by the main text in Portuguese. If the dissertation is written in English, the abstracts' order will be first English and then Portuguese, followed by the main text in English. However, this order can be customized by adding one of the following to the file `5_packages.tex`.

```
\ntsetup{abstractorder={<LANG_1>,...,<LANG_N>}}  
\ntsetup{abstractorder={<MAIN_LANG>={<LANG_1>,...,<LANG_N>}}}
```

For example, for a main document written in German with abstracts written in German, English and Italian (by this order) use:

```
\ntsetup{abstractorder={de={de,en,it}}}
```

Concerning its contents, the abstracts should not exceed one page and may answer the following questions (it is essential to adapt to the usual practices of your scientific area):

1. What is the problem?
2. Why is this problem interesting/challenging?
3. What is the proposed approach/solution/contribution?
4. What results (implications/consequences) from the solution?

RESUMO

Independentemente da língua em que a dissertação está escrita, geralmente esta contém pelo menos dois resumos: um resumo na mesma língua do texto principal e outro resumo numa outra língua.

A ordem dos resumos varia de acordo com a escola. Se a sua escola tiver regulamentos específicos sobre a ordem dos resumos, o template (L^AT_EX) *novathesis* irá respeitá-los. Caso contrário, a regra padrão no template *novathesis* é ter em primeiro lugar o resumo *no mesmo idioma do texto principal* e depois o resumo *no outro idioma*. Por exemplo, se a dissertação for escrita em português, a ordem dos resumos será primeiro o português e depois o inglês, seguido do texto principal em português. Se a dissertação for escrita em inglês, a ordem dos resumos será primeiro em inglês e depois em português, seguida do texto principal em inglês. No entanto, esse pedido pode ser personalizado adicionando um dos seguintes ao arquivo `5_packages.tex`.

```
\abstractorder(<MAIN_LANG>):={<LANG_1>,\dots,<LANG_N>}
```

Por exemplo, para um documento escrito em Alemão com resumos em Alemão, Inglês e Italiano (por esta ordem), pode usar-se:

```
\ntsetup{abstractorder={de={de,en,it}}}
```

Relativamente ao seu conteúdo, os resumos não devem ultrapassar uma página e frequentemente tentam responder às seguintes questões (é imprescindível a adaptação às práticas habituais da sua área científica):

1. Qual é o problema?
2. Porque é que é um problema interessante/desafiante?
3. Qual é a proposta de abordagem/solução?
4. Quais são as consequências/resultados da solução proposta?

DISCLOSURE OF USAGE OF GENERATIVE ARTIFICIAL INTELLIGENCE

The author, John Very Longname Doe, acknowledges the use of the following generative artificial intelligence tools in the development of this thesis. These technologies were utilized under strict supervision, and all AI-generated outputs were critically reviewed and verified for accuracy. The author accepts full responsibility for the validity and originality of the content, confirming that the use of these tools aligns with all institutional policies and standards of academic integrity.¹

Generative AI tools used: ChatGPT-5.2, Gemini 3 Pro, Claude 4.5 Opus, and Perplexity 12.12.25.

Activities supported by Generative Artificial Intelligence Tools:²

Conceptualization		
☐ Idea generation	☐ Formulating research questions and hypotheses	☐ Hypothesis viability assessment
☒ Defining the research objective	☒ Feasibility assessment and risk evaluation	☐ Simulated debate and argument testing
Literature Review		
☐ Search and Discovery	☒ Concept Mapping and Systematization	☐ Gap Identification and Novelty Evaluation
☐ Literature summarization and synthesis	☐ Market/patent landscape analysis	☐ Cross-lingual literature comprehension
Methodology		
☐ Experimental Design Optimization	☐ Development of experimental or research protocols	☒ Methodological Instrument Selection

¹This declaration was generated using Lua $\text{\LaTeX}$ [3] and the $\text{\LaTeX}$ package aidisclose [1].
²This list extends the GAIDeT taxonomy [2].

Software Development and Automation

- | | | |
|---|--|--|
| ☐ Code Generation | ☒ Debugging and Repair | ☐ Algorithm design |
| ☐ Refactoring and Optimization | ☒ Process automation | ☐ Code documentation and comment generation |

Data Management

- | | | |

| ☐ Drafting Text | ☐ Formulation of conclusions | ☐ Citation formatting and bibliography management |
| ☐ Polishing and Editing | ☐ Tone Adjustment | ☒ Press releases and outreach materials |
| ☐ Abstract and Executive Summary Generation | ☐ Translation | ☐ Title Generation |

Ethics Review

- | | | |
|---|---|--|
| ☒ Bias analysis and discrimination assessment | ☐ Ethical risk analysis | ☐ Data confidentiality monitoring |
| | ☐ Monitoring compliance with ethical standards | |

Quality Assurance

- | | | |
|--|--|--|
| ☒ Simulated Peer Review | ☐ Identification of limitations | ☐ Publication support |
| ☐ Consistency checking against field trends | ☒ Publication strategy and journal selection | |

Additional comment #1: The AI was used primarily for refining the code in Section 3, but the algorithm logic was derived manually.

Additional comment #2: This is a second additional comment!

Additional comment: This is a third additional comment! It is starred and, thus, does not get a number. Also, this comment is longer and, hopefully, will span to the next line!

Additional comment #3: This is the third non-starred additional comment!
